DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 4-11 and 17-27 are allowed.
2. The following is an examiner's statement of reasons for allowance: Neither Palanisamy et al. nor Kliman teach a method of analyzing operating characteristics of a motor actuated system that includes sensing a current drawn by a motor, identifying a predetermined number of brush-switching peaks in the current waveform corresponding to a predetermined rotational travel and setting a width of the current waveform, defined by the predetermined number of brush-switching peaks, equal to a predetermined number of equally spaced increments to normalize the current waveform from the time domain to a set of data points defining a waveform in the spatial domain corresponding to the predetermined rotational travel of the motor, as shown in claim 1, or sensing current drawn by a motor, analyzing the current waveform to determine a dominant frequency band, filtering the current waveform about the band, identifying a predetermined number of peaks in the filtered current waveform corresponding to a predetermined rotational travel of the motor, defining a width of the unfiltered current waveform using the predetermined number of peaks and setting the defined width of the unfiltered current waveform equal to a predetermined number of equally spaced increments to normalize the current waveform from the time domain to a set of data points defining a waveform in the spatial domain corresponding to the predetermined rotational travel of the motor, as shown in claims 20 and 24.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manuel L. Barbee whose telephone number is 571-272-2212. The examiner can normally be reached on Monday-Friday from 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marc S. Hoff can be reached on 571-272-2216. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
